All is right in my world once again Zen/Mac I'm glad I came across this thread I'm thinking of buying a iMac.. You should see a USB symbol with arrows spinning around it on the player and connected should display at the bottom of the window.. Have just tried the XNJB program and no luck unless I am doing something wrong it doesn't recognise the Zen.

I have a Zen Neon and recently purchased an iMac Enjoying the transition from PC to Mac apart from the Zen and Mac not being on speaking terms.. I can see the Zen come up as a device on the Mac desktop and it lets me throw music to it with the Zen even lighting up as if it is receiving data but when I check the Zen the music is not there.. Once the player is fully powered up, press the 'Connect' button at the bottom-right hand corner of the window.. Creative Zen compatability (+video problems) For anyone who is having problems with this, many of the answers are simple.

If you have a song on your MP3 player and want to add it to a different MP3 player, you don't have to purchase any additional programs, as long as you have a computer present.. I can see the Zen come up as a device on the Mac desktop and it lets me throw music to it with the Zen even lighting up as if it is receiving data but when I check the Zen the music is not there.. Enjoying the transition from PC to Mac apart from the Zen and Mac not being on speaking terms.. My ancient pirated WindowsMe doesn't like it, missing integral files Now I'm wondering--in conversing with the salesman, all of my Windows-based files on my ext Zip and on my cpu should transfer seamlessly to the iMac, and all of my usb devices will work, according

to him. [Muat Turun Al Quran For Pc Windows 8 Digital Back Cover](#)
